To Fredric and Gosia,

I thank God for this opportunity to communicate to you through this letter appreciating all good things I have received. Thank you very much may the Lord of Blesses bless you abundantly.

I am a complete orphan my parents died when I was too young. There left four in the family two boys and two girls and were brought up by our Grandmother who even was not able to make us go to school. It was only by a chance of U.P.E (Univasal Primary Education) that I managed to complete P.7 and passed P.L.E. I didn't go in Senior due to financial problems.

By this time I want to join Senior one (S1).

I like singing, hand craft (make baskets), playing netball. My favorite subjects are History, C.R.E, biology and healthy science and English. My dream is becoming a lawyer and my hope is through you that my dreams will come true.

Thank you
I remain yours faithfully

Hay

This is KAHUNDE PRISCILLA of Kigarama Talents high school.

Before I proceed let me first greet you, how are you? let me hope that you are fine. Back to me the pen holder am fine and so glad to write this letter to you.

firstly and for most thing which I want to put across are special thanks to you heek and gosia for the work which you are doing and sponsoring us. I thank you so much because you helped us so, so, and so much, nothing to give but only the almighty God bless you.

→

I want to thank you because you helped. Really am an orphan aged sixteen years. My father died when I was ten months only, I don't know him in my life my because he died when I was still young and I stayed with my mother up to now. I completed my primary level at Kasiisi primary school and I scored 23 aggregates in my exams.

From there I went to Rooro high school where I studied only one term, then I stopped because of school fees and spent one year at home without schooling. And the next year my mother tried for her best and she took me to Kigarama Talents High school where am up to now.

School and we spend a day with out study
and seeing the headmistress at the end of
school time. For us we are trying to study
but the teachers are not teaching well mostly
and we are still behind mostly in science
Subjects like chemistry, Agriculture and biology.
Now am in senior two, the first term
I took the 9th position, second term 8th and
now promoting to senior three took the 4th
position.

my favourite subjects are chemistry, biology,
political education, history, Geography and fine art
and in future I would like to be a nurse.
my favourite things which I enjoy in my
life are playing net ball, ~~go~~ going to tour
Reading my books, listening to the radio and
going out side my country but I doesn't manage
it.

I
Let me hope that you will be back
in my home country for which is full of gifts
of nature and talk more.

Because of time let me end from
here. I wish you prosperous new year
and success in what ever you are doing
